DETAILED ACTION

Reasons for Allowance

Claims 1-16 are allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest the diffractive part comprising birefringent material sensitive to the first, second and third polarizations, wherein the stepped profile is designed such that the heights of the steps of a pattern element introduce phase changes that substantially equal at least two different multiple of 2π for said wavelength and at least two substantially different phase changes modulo 2π for said second wavelength as set forth in the claimed combination in each independent claim.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
